

Person ID	Problem	APP/Website Name	Likes	Don't likes	Improvements
Mohan	We communicate only through AI chatbot.	Wysa	While the app claims to offer therapy, it is actually mental health coaching from either US-based coaches or with a licensed therapist in India, and is only available via text message.	All of the activities and exercises are done with the guidance of the AI chatbot. Which can be frustrating for some.	The model can be trained better so that it gives more the reply more the reply more customized for the particular user.
srilatha	This app is only supported in android but not compatible for IOS.	Hello Jipmer	The app helps patients to call and book appointments in jipmer hospital.	Even after entering the specified details some of the details like district etc.... are missing.	It should be made compatible for IOS and also enable online booking through the app itself.
Pavankalyan	Amazonprime needs a high speed connectivity network. We can't watch movies if we don't have a proper network connectivity.	Amazonprime	Has a wide genre of movies leaving us with many options to watch. Esp it has good number of Indian movies which I would love to watch.	The search operation on Amazonprime doesn't work properly which sometimes becomes really annoying.	They can improve their search algorithm to work better.
Lokesh	Sometimes the app randomly stops counting the steps	Step Counter	It tracks steps, minutes, distances and calories also we can see daily and weekly charts	There is a huge battery drain because the app runs in the background to count the steps	It just support in some of the versions of the Androids
